RE: Lead and Mercury Testing

---

In August of 2009, testing was performed for PABCO Paper by Positive Lab Services of Los Angeles to determine the level of Lead and Mercury present in the raw material and effluent. The samples taken, tests performed and results are summarized in the table below.

Test	Date	PLS Report no.	EPA 3010A/ EPA 6010B Lead	EPA 245.1 Mercury	EPA 7471A Mercury
Effluent	8/07/09	9080051	Non Detected	Non Detected	
Filler Creamface	8/07/09	9080052	Non Detected		Non Detected
Liner Creamface	8/07/09	9080054	Non Detected		Non Detected
Filler Greyback	7/28/09	9070172	Non Detected		Non Detected

In summary, PABCO Paper has determined that there are no detectable levels of lead or mercury in any of the raw material or effluent streams.
